

# Robotic Process Automation

Digitalize your IT & cyber processes

Contact us: [contact@almond.consulting](mailto:contact@almond.consulting)

Almond's RPA approach enables you to **automate your IT & Cyber processes** and realize **significant gains in productivity and quality**.

An analytical approach to meet the following challenges :

- > Which IT and Cyber processes are eligible for robotization?
- > What are the expected operational and economic gains?
- > Which solution is best suited to your needs?
- > How can you focus your IT teams on high value-added tasks?

## Our offer

Assessment & Strategy	Deployment	Change & Monitoring
<ul style="list-style-type: none"><li>&gt; Realization of an <b>RPA diagnosis</b> integrating the <b>security</b> and <b>risk</b> dimensions</li><li>&gt; <b>Analysis</b> and <b>qualification</b> of processes <b>eligible</b> for automation : <b>management of requests and incidents, production of morning checks, IT reporting, cybersecurity indicators</b></li><li>&gt; <b>ighlighting the benefits</b> of each process to be automated</li></ul>	<ul style="list-style-type: none"><li>&gt; Implementation of a <b>POC</b> (proof of concept) to verify the <b>technical and functional feasibility</b> and the <b>expected benefits</b></li><li>&gt; Implementation of the RPA solution: <b>implementation, testing, and training</b> of employees</li></ul>	<ul style="list-style-type: none"><li>&gt; Support for the <b>change</b> induced by the implementation of RPA: focus on high value-added tasks and integration into the new defined processes</li><li>&gt; <b>Monitoring</b> of the implemented robots: <b>governance, optimization, support</b></li></ul>

## The benefits

**1** Mapping of your **key processes**
