

# Resilience and the health crisis

Capitalize on lessons learned from the health crisis and cloud opportunities to increase resilience

Contact us: [contact@almond.consulting](mailto:contact@almond.consulting)

## What lessons can you learn from the health crisis to strengthen your BCP? What solutions can the Cloud provide?

An approach to meet your challenges:

- > Be better prepared for crises that may affect your company and its ecosystem
- > Adapt your practices to collaborate effectively in a telework situation
- > Maintain a high level of cybersecurity in all circumstances
- > Take advantage of the opportunities linked to Cloud solutions to digitalize your processes

### Our offer

#### Assessing the COVID-19 health crisis

- > Evaluate the impacts of the health crisis
- > Capitalize on the lessons learned from this exceptional situation
- > Identify new uses and needs (employee unavailability, telecommuting, etc.)

#### Strengthen your Business Continuity Plan

- > Adapt the risk analysis and the Business Impact Assessment (BIA) to the specificities of a health crisis
- > Develop a plan to reinforce the continuity and recovery mechanisms
- > Test these new systems

#### Take advantage of the Cloud lever

- > Assess eligibility for a Cloud transformation and the associated opportunities
- > Propose Cloud architecture solutions adapted to your challenges and resources
- > Digitize your business processes (RPA, BPM, etc.) and secure your collaborative uses (Teams, Slack, etc.)

### The benefits

**1** Learning from the crisis to prepare for the future

**2** Adapting resources to new forms of crisis

**3** Implementing technological resilience by design

### Our value proposition

Recognized expertise in cybersecurity

More than 15 years of BCP and crisis management auditing and consulting

An operational vision of cloud transformation
